

POLICY FOR THE QUALITY, SAFETY AND HEALTH ON THE LABOUR AND INFORMATION SECURITY

The Management intends to operate according to the Law UNI EN ISO 9001:2015 and considers health, labour security and protection of the company's data, an important value.

It considers that a culture about quality, security and protection of corporate data, based on incessant improvement and on the prevention, has to be the key point on which the company could develop the way to work.

It would guarantee to all employees and partners, clients and suppliers, the satisfaction on implicit and explicit requirements on the business activity, on all functional phases, from the order's procurement to the after-sales.

It would guarantee to all employees and partners harmless and healthy job places and make an effort in order that these conditions would be existing in all activities, involving the supervisors in charge and the staff to an active participation to pursue "Guidelines for a system to manage labour's health and security."

It would guarantee the protection of data as a whole (commercial and personal data) and constantly make an effort on the research and use of technological solutions and forefront IT tools. It has regulated and implemented a safe information management system, through rules' introductions, organizational procedures and guidelines enriched from educational paths on privacy and safeguard of items and data extended to all employees.

DALDOSS ELEVETRONIC management with this document engages himself also to:

- ✓ Respect the legislation and others agreements about security, health and treatment of personal data applicable to all activities, products and offered services;
- ✓ Sensitize and inform all employees that the responsibility on a correct administration of the health, job's harmless, and privacy observance, belongs to each worker considering his own obligation and duties;
- ✓ Provide human and instrumental resources to consistently prevent and enhance;
- ✓ Involve and consult with employees also through their safety agents;
- ✓ Review periodically this policy and the actualized management system;
- ✓ Define and impart in the company the objectives and relative fulfillment programs;
- ✓ Sensitize and inform external company's partners on the necessity to respect correct rules of law about quality, security, hygiene and privacy applicable to DALDOSS ELEVETRONIC'S business;
- ✓ Inform suppliers and visitors about procedures and principles of the Management System on quality, security and secure information treatment respecting privacy.

D.E. Management wishes to demonstrate his commitment on the continuous improvement on the quality management system, health and security safeguard of employees and on the right treatment of personal and corporate data.
